**EnviroSolutions Wraps-Up Innovative Recycling Program**

*Service included cost-saving solutions for local Marinas and Nurseries*

ROCHESTER, N.Y., August 4, 2008 – EnviroSolutions, LLC announced the success of the “*It’s A Wrap*” recycling program. The program helped local businesses efficiently dispose of large shrink-wrap and plastic container waste in a cost-effective manner while supporting the recycling and reuse of the material. Shrink-wrap is found covering everything from boats stored at marinas to large plant stocks at local nurseries while plastic containers are used in a variety of shipping and storage activities. The disposal of the low-density polyethylene plastic commonly found in these products is costly for small businesses and millions of pounds of the plastic are sent to landfills every year.

By working with EnviroSolutions, merchants were able to not only save money but also take part in an effort to reduce shrink-wrap waste in landfills. The “*It’s A Wrap*” program sent the EnviroSolutions high-tech vehicle fleet to collect the plastic waste which was then processed for recycling and reuse in various forms. Recycled shrink-wrap and plastic materials can be transformed into a variety of products such as lawn edging, plastic banners, decking, benches, and guardrail blocks. The program benefits not only the businesses that participate, but also the organizations such as local governments that purchase the repurposed material at low prices.
