EnviroSolutions Unveils Rochester's First Scrap Tire Collection Service

Service offers environmentally friendly tire collection at affordable costs with flexible options

ROCHESTER, N.Y., April 15, 2008 – EnviroSolutions Group, Inc. announced today the launch of its scrap tire collection service, providing the area's first Rochester-based operation focused specifically on the removal of scrap tire waste on location. Operating with an official license from the New York State Department of Environmental Conservation, EnviroSolutions enables businesses of any size to legally dispose of all scrap tire waste in a cost-effective, flexible and environmentally friendly manner. EnviroSolutions is a locally owned consulting group specializing in providing businesses with cost-effective and innovative waste disposal and recycling solutions with a focus on improving the environment.

The scrap tire collection service offers customers flexible options such as a dependable twenty-four hour pickup guarantee during business hours, dumpster and container rental, consolidated billing and free cost estimates. The scrap tire collection service is offered throughout Monroe, Wayne, Ontario, and Genesee Counties.

EnviroSolutions offers many competitive advantages in the utilization of advanced fleet technologies. Packer trucks incorporate leading edge compacting systems to enable a more efficient use of cubic area which allows more tires to be

loaded within individual trucks. The benefits of higher volume utilization allows the EnviroSolutions fleet to acquire more scrap tire material in a single run, decreasing not only route times but also the use of gasoline. This allows the scrap tire removal service to offer low prices to the market served than other regionally-based organizations.

The dependable service is offered in a variety of flexible scheduling options including weekly, bi-weekly, or monthly plans. On-demand service is also available for customers with smaller scrap tire removal needs. Pick-up service is normally completed within as little as fifteen minutes due to the automatic compacting methods utilized within the EnviroSolutions fleet of packer trucks.

EnviroSolutions promotes its scrap tire collection service as an environmentally friendly alternative to dumping. They do not send any waste to landfills or other disposal sites and instead recycle all scrap into re-usable materials.

EnviroSolutions provides customers with innovative recycling and waste disposal solutions that are measurable and achievable while supporting and sustaining the environment and community in which it operates. EnviroSolutions is headquartered in Rochester, N.Y., with support coverage in a wide region of upstate and central New York to businesses of all sizes.
